Punchdown

The Quality and Durability You Need!

Terminate your cables with proper tools

Having the proper tools to do the job is essential for terminating the cable. Taking short cuts can damage the cable and when you are using the cable to power a wireless hub in a ceiling with Power over Ethernet (PoE) you can damage ports in your network switch or your wireless hub. Using a knife to cut the jacket off a cable is a bad idea because you can cut into some wire pairs causing a short in the cable or increasing the signal loss on the cable. Several tools would be required in order to get the ideal result, especially for professional installers and contractors.

CUTTER

Pro Cable Cutter

P/N : T40220

- Cut solid and standard cable.
- Good for round cable
- Good for multi-conductor cable
- Good for coaxial cable
- Cut multiple cables at a time

Heavy Duty Cable Cutter

P/N : T40120

- Cut solid and standard cable.
- Good for round cable
- Good for multi-conductor cable
- Good for coaxial cable

STRIPPER

Multiple Cable Strip & Cut

P/N : T30110

- Adjustable stripper for networking cables
- Stripper for RG59/6 and RG7 cables (changable cassettes)
- Built-in cutter for round and flat cables (not for steel)
- Built-in de-twist function
- Built-in Straighten function
- With Velcro to brush the copper braid

Network Cable Strip & Cut

P/N : T30210

- Adjustable stripper for networking cables
- Compact, light weight, and rugged design
- Built-in stripper for flat cable
- Built-in cable cutter (not for steel)
- Built-in de-twist and straighten function

Easy Stripper (UTP)

P/N : T3031U

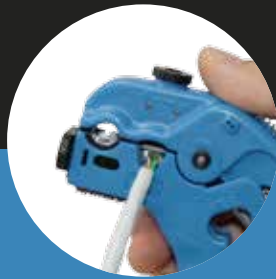

- Strip UTP / STP cables
- Built-in de-twist function
- Built-in Straighten function

CUT

Cut the ends of the cables with a nice and sharp cutter

STRIP

Safely cut the jacket off the wires inside without cutting the wires.

TERMINATE

Crimp the modular plug onto the wire to make a good connection on each of the pins of the data plug.

TEST

Test your cable before you use it.

Easy Stripper (Coax)

P/N : T3031C

- Strip Coaxial cable RG5 / RG59 / RG6
- Compact, light weight, and rugged design

Coaxial Cable Stripper

P/N : T304106

- Strip Coaxial cable RG58 / RG59 / RG6 / RG62
- Compact, light weight, and rugged design
- Precise cutting blades for clean stripping result
- 2-blade and 3-blade model available

CRIMPER

Heavy Duty RJ Crimper

P/N : T10420

- For 8P8C/RJ45, 6P6C/RJ12, 6P4C/RJ11
- Ratchet mechanism
- Steel frame for maximum force saving
- High leverage and stable platform for repeatable terminations
- Multiple function for professional use
- Built-in cutter for round and flat cables (not for steel)
- Built-in stripper for round and flat cables
- Yellow safty cup to prevent accidents

10Gig RJ Crimping Tool

P/N : T10310

- For 8P8C/RJ45, 6P6C/RJ12, 6P4C/RJ11
- Compact, light weight, and rugged design
- Easy to crimp with hand force
- Termination for 10Gig performance
- Built-in security lock for easy storage

Not for use on standard RJ45 connectors.
 Good for Cat6A connector with external ground shown as left.

Crimper

Pro RJ Crimping Tool

P/N : T10210

- For 8P8C/RJ45, 6P6C/RJ12, 6P4C/RJ11
- Compact, light weight, and rugged design
- Ratchet mechanism
- Easy to crimp with hand force
- Multiple function for professional use
- Built-in round cable cutter
- Built-in stripper for round & flat cable
- Built-in security lock for easy storage

Compact RJ Crimping Tool

P/N : T10110

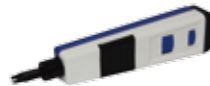

- For 8P8C/RJ45, 6P6C/RJ12, 6P4C/RJ11
- Compact, light weight, and rugged design
- Easy to crimp with hand force
- Multiple function for professional use
- Built-in round cable cutter
- Built-in stripper for round & flat cable
- Built-in security lock for easy storage

Punch Down

Heavy Duty Punch Down Tool

P/N : T50130

- Terminate& Cut Cat3 / 5 / 5e / 6 cables
- 110, 66, Krone stlye changeable blade
- Adjustable Low and High impact force settings
- For precise, repeatable and reliable terminations

COAX COMPRESSION

Coax Compression Tool

P/N : T20210

- For F, BNC, and RCA coax compression connectors
- For RG59 / RG6 / RG11 cables
- Adjustable plunger on multiple types of connectors
- Multi-position nest for various size of connectors
- Open design for easy insertion and removal
- With locking nut to retain plunger settings
- With handle lock for easy storage
